

SAAO DIGITAL DIARY

Automated Agro Service Delivery and Remote Monitoring of Extension Services

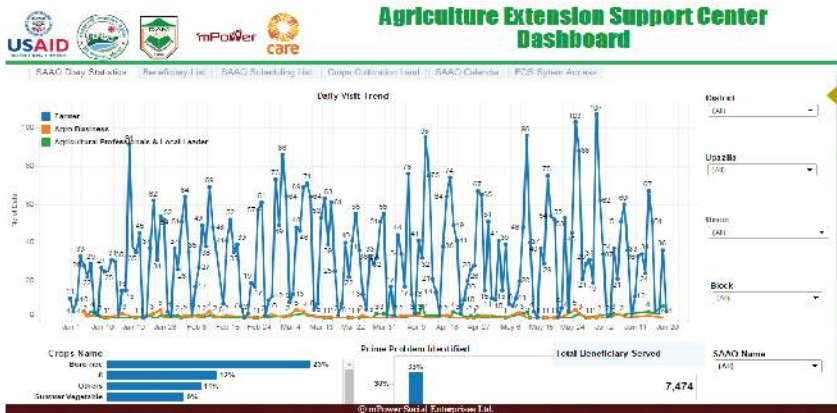

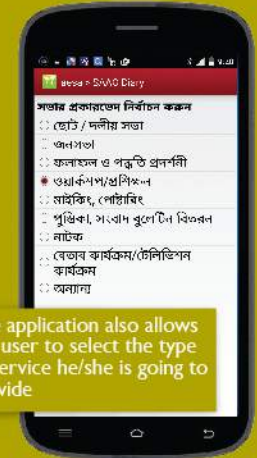

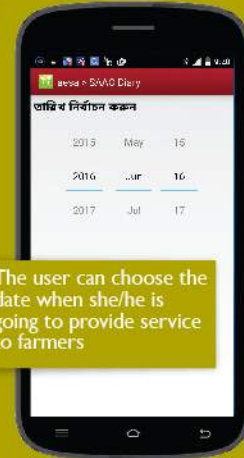

ADVANTAGES OF SAAO DIARY:

- Lets the user/SAAO put in detailed information for example: what kind of service, who are the service receivers, on which date and what place, etc.
- Reduces hassle of paper work and saves time through introduction of inserting activity information via smartphone

SAAO Diary is a smartphone application which was developed to help Sub-Assistant Agriculture Officers to log in their daily visits or services provided to the farmers digitally. To ensure accountability and transparency, a web dashboard was developed as well to be used at supervisors (Upazila Agriculture Officer/UAO) end. Through SAAO Diary application, Sub-Assistant Agriculture Officers can put their daily activity information which can be viewed by their supervisors for monitoring purpose. This whole process was initiated to reduce the lengthy administrative process that takes place between UAO and SAAO usually over paper based documents.

The user can choose the date when she/he is going to provide service to farmers

The application also allows the user to select the type of service he/she is going to provide

FEATURES AND ADVANTAGES OF WEB DASHBOARD:

- Lets the user/UAO see daily visit trend of the SAAOs working under their supervision
- User can track activities of a specific SAAO working in a particular block
- Works as monitoring tool for the user
- Ensures accountability and transparency which helps the users make an informed decision
